**CRITERIA FOR PACKAGING & PROCESSING MACHINERY/EQUIPMENT CATEGORY**

Should the submission be for Packaging & Processing Machinery only, rather than a collaborative solution, then the criteria will recognise the development of a packaging or processing line or module that results in the significant advancement of packaging and processing machinery technology by either introducing a new idea or modifying an existing principle. The design concept and implementation are weighted highly in the award decision, where better business performance must be achieved.

Criteria for this category will include:

- Identifying the significant advancement of the packaging and processing machinery – including unique technology or design aspects that makes this equipment stand out as innovative.

- Identifying Return on Investment for customers – including where possible references and testimonials from existing customers.

- Identifying the greater benefits of the machinery/equipment for the wider industry.
