☐

### AGRICULTURE

Packaging systems/format that is used to contain and distribute fresh produce from farm to wholesale market and/or retail outlet. Entrants to demonstrate how their packaging protects the fresh produce and reduces/prevents damage during transit and/or display while also extending shelf life and minimising food waste. This may be through reducing crushing, enhanced cushioning, enhanced ventilation, increased shelf life and avoiding double handling.

☐

### FOOD SERVICES

Packaging systems/format that is used to contain and distribute food into food service establishments. Entrants to demonstrate how their packaging contains, protects and distributes their food product from manufacturing location through to the food service establishment, while also extending shelf life and minimising food waste. This may be through bulk sizing, individual servings, opening and or dispensing features, resealable/re-sealable features, barrier materials and improved communication on packaging.

☐

### RETAIL

Packaging system/format that is used to contain, protect and distribute food from manufacturer to retail shelf and then through to consumer use (e.g., in household, on the go). Entrants are to demonstrate how their packaging contains, protects and enables the consumer to store and use the food item, while also minimising food waste. This may be through individual servings, bulk sizing, opening and or dispensing features, resealable/re-sealable features, barrier materials and improved communication on packaging.
