

SPE: A-NZ Technical Seminar
How automation, software, ancillary equipment and processing aids make your plastics processes more competitive
Sponsored by Mil-tek Waste Solutions

	Tuesday 15th September 2015 5:30 pm for 6:00 pm start	
	Dooleys Catholic Club 24-28 John Street, Lidcombe, NSW 2141	
	<p>Tony Mercieca from Chem-trend will present on mould release agents (free samples will be made available) and purging systems for injection moulding.</p> <p>Sascha Baumanns will present about the INTRAVIS vision inspection systems for the plastic packaging industry. As market leader of turn-key solutions the company specializes in cutting-edge technology and downstream equipment for the inspection of bottles, closures, preforms and decoration.</p> <p>Tom Mitchell will introduce his company Profile Solutions, an Australian manufacturer of leak detection systems, and demonstrate that they provide a competitive advantage over other systems in the world.</p> <p>Yathin Naidoo from MacroMeasures will share with you how tracking quality could be improved by outsourcing to a specialist data service.</p> <p>Christian McLean from Mil-tek will make a short presentation on how you keep your shopfloor clean from waste packaging by using compacting systems.</p> <p>For further information contact Han Michel on 0416 168 255 or hanmichel@bigpond.com</p>
