PACKAGING AND PROCESSING INNOVATIONS DISCOVERED AT INTERPACK 2017: Come and hear a series of panellists discuss the innovations seen and ideas drawn from attending and exhibiting at interpack 2017; the world's leading trade fair.

Interpack is the essential event for the food, beverage, confectionery, bakery, pharmaceutical, cosmetics, non-food and industrial goods sectors. No other trade fair in the world presents the entire supply chain. At no other trade fair does the packaging industry provide all sectors with tailored solutions and innovative designs based on such a variety of materials, and it is, of course, THE event for the packaging industry.

As the major inspiration for the packaging industry and all related process technologies 2,700 exhibitors from more than 60 countries recently presented their latest ideas, innovative concepts and technological visions at interpack 2017. The innovations were not only in equipment and machinery for packaging and processing, but also in production tools for packaging materials, materials themselves, and services for the entire industry.
