## CHEP SERVICE CENTRE - SITE TOUR THURSDAY 6 SEPTEMBER

AUSTRALIAN INSTITUTE  
OF PACKAGING

### WHEN:

Thursday 6 September

### WHERE:

CHEP Service Centre  
2-26 Quarry Rd, Erskine Park, NSW

### WHAT:

#### Australia's global leader in supply chain solutions

From its origins in Australia in 1946, CHEP has played a crucial role as a global supply chain solutions partner, supporting retailers, manufacturers and transporters to move and handle goods cost-effectively and sustainably across Australia, and around the world. CHEP have a wide range of industry platforms and solutions – more than 300 million shared and reused by growers, manufacturers, distributors and retailers, worldwide. Through these, CHEP enables customer's supply chain to meet their profitability and sustainability goals, without having to compromise one for the other. While CHEP help customer to improve their bottom line they also help reduce the impact on the environment including; consumption of natural resources, and waste sent to landfills.

Attendees have the opportunity to learn more about the CHEP's sustainability model and goals, and have a guided tour of the repair facility and Logistics Control Centre. The National Logistics Control Centre system uses detailed real-time information from multiple sources, including video feeds from CHEP yards and live network data, to predict whether a delivery of CHEP equipment will be impacted by events in the network. Using their data, network knowledge and logistics management expertise, the CHEP Australia team has designed a sophisticated logistics management system that will improve the level of service they provide customers. The Logistics Control Centre not only provides a greater level of network visibility, but also features mechanisms to help manage issues as they arise. If a delivery is impacted by issues such as traffic congestion, the system triggers an alert which assists the team in proactively managing the situation. In the event of a delay, the team is significantly better enabled to quickly contact customers with a revised expected delivery time.

### TIME:

9.45 am arrival for 10.00 am start  
This site visit will take approximately one and a half hours.
