AIP STATE OF INDUSTRY UPDATE WEBINAR: PRODUCT STEWARDSHIP & AWAY FROM HOME COLLECTION

WHAT:

The 5th AIP State of Industry Webinar will look at a wide range of successful product stewardship and Away from Home programs that actively engage the consumer with the collection. Product Stewardship Programs enable households access to recycling and safe disposal services for products once they have reached their end of life.

Many of the Product Stewardship programs have been designed to capture and reprocess packaging and materials that can not be collected through a traditional Materials Recovery Facility (MRF). 'Away from Home' collection and drop off points are established for these materials or packs so that they don't end up in landfill and can have a longer lifecycle. Some hazardous and flammable products require safe disposal such as paints, chemicals and batteries and Away from Home collection ensures the product is disposed of safely. These programs keep valuable resources circulating in the economy for as long as possible, reduce the impact of a product on the environment and offer effective end-of-life recovery systems.

Whether it is soft plastics, pharmaceutical blister packs, aseptic cartons, make up, toner and ink cartridges, batteries, paint, e-waste or coffee cups, everyone can proactively engage with numerous Product Stewardship programs across the country. Find out more about some of the unique and innovative programs that are available and how your business, and your household can get on board.

WHEN:

Wednesday 21st August 2024

MEET THE SPEAKERS:

Steve Morriss MAIP
Head of Circularity
Close the Loop

Jason Rijnbeek
Business Development
