

AIP to Partner with Packaging Cockpit: *One system for the entire supply chain*

Supporting Australasian Companies who export to Europe to meet PPWR regulations

The European Packaging and Packaging Waste Regulation (PPWR) is now binding for all EU member states, which, for many brands will require a rethink and new approaches to packaging development. For example, in terms of recyclability, recycle content or regulations to minimise packaging. The PPWR regulations does not apply only to Europe; it applies to any company that is selling into any European member state.

The PPWR will also require detailed data management, accurate and real-time Packaging specifications, Declarations of Conformity & Technical Documentation. The Packaging Cockpit can solve all of your data problems.

What is the Packaging Cockpit?

The AIP is pleased to introduce the Packaging Cockpit, a Global Packaging Specification Management Software. With the Packaging Cockpit you can manage your packaging worldwide intuitively and more importantly the basic version is available free of charge. The Packaging Cockpit is a tool that calculates the technical recyclability, as well as the life cycle assessment of packaging systems, scientific calculations, data interface with suppliers and brands. The goal with the tool is to make the recyclability of packaging systems transparent and help companies to make the right decisions when optimising their packaging portfolio.

The Packaging Cockpit is intended to be applied both internally within companies and to entire supply chains. The team integrates a scientific database and scientific methods into software that is suitable for mass data.

Helping to meet PPWR & EPR regulations

If you are exporting to Europe, or working with brands that are, and they need to fulfill the Declaration of Conformity for the Packaging & Packaging Waste (PPW) Regulations then this intuitive system will be the answer. Not only can the Packaging Cockpit fulfill PPWR regulations, but also other Extended Producer regulations across all corners of the globe. One System for the entire supply chain. The calculations can also be performed for different countries, allowing country-specific evaluations. In addition, further management functions of the packaging portfolio can be performed.

The Packaging Cockpit will :

- Support PPWR compliance.
- Help you to calculate recyclability and life cycle assessment.
- Help you to build a supplier platform for structured data exchange.
- Help you to create the Declaration of Conformity and Technical Documentation required under the PPWR.
- Help you to interface with your suppliers via the tool so that you can access real-time data.
- Teach you how to use the Packaging Cockpit to build packaging specifications across your company.

We can now issue

EU-Declarations of Conformity according to Regulation (EU) 2025/40 (PPWR)

Official. Compliant. Future-ready.

READY FOR
THE FUTURE

Whether you are a packaging manufacturer, packaging supplier, brand owner or retailer, dealing with the specifications and material properties of your packaging in real-time will enable your business to be a part of the cross-border exportation of your packaging into Europe.

The AIP are proud to be able to support any packaging manufacturer, supplier or brand from Australia, New Zealand and Southeast Asia that sells into Europe to prepare you for PPWR and the on-going European regulatory changes. The comprehensive on-line tool Packaging Cockpit will aid any Australasian company to develop and provide accurate and real-time data management and automatic calculations. As the Australasian reseller, the Australasian Institute of Packaging (AIP) has a partnership with Packaging Cockpit GmbH from Austria.

The AIP is bringing this global system to all of our Members and Industry colleagues.

How does the Packaging Cockpit support you?

With the Packaging Cockpit as an on-line tool, you can calculate various key figures of your packaging(s), such as country-specific recyclability (depending on the target market) or the carbon footprint and other impact categories of a life cycle assessment. In addition, you can manage the data collected in the tool yourself and also share it with selected customers or suppliers.

Thanks to the well-founded and meaningful results of the Packaging Cockpit, it is already possible for you to start sustainable packaging development and optimisation today. Through broad application of the Packaging Cockpit, the assessment of the recyclability of packaging in Europe can be standardised and also made comparable.

Get started free of charge with the basic version of the Packaging Cockpit

With a free basic version of the Packaging Cockpit, the Australasian Institute of Packaging (AIP) will make it easy for anyone in Australasia to enter the world of sustainable packaging development.

The following overview shows you the possibilities of the Packaging Cockpit. The specific scope of the free basic version, as well as the other fee-based additional services (as an extension of the basic version) are shown.

Register Sign up for the basic version today and then obtain the additional services via the webshop.

Packaging Cockpit Registration

The digital solution for your packaging – request your free basic version account now!*

**Packaging Cockpit promise: The basic version is and will remain available to you free of charge.*

Please note that each company or organisation is only allowed to have one free account.

The free basic version is limited to one user. Other users of the same organisation need separate licences, which can be purchased in their webshop. The webshop is located in the Software Packaging Cockpit at the top right of the login area.

Please use the following registration link for this purpose:

The offer of the AIP

Are you unsure whether the Packaging Cockpit is the right tool for you? The AIP would be happy to demonstrate the Packaging Cockpit to you and support you in selecting the additional services you need.

The AIP will also accompany you independently of the tool on your way to PPWR compliance, or in general in the process of packaging development and optimisation.
