

TEXTBOOKS AVAILABLE THROUGH THE AIP

1 FUNDAMENTALS OF PACKAGING TECHNOLOGY, SIXTH EDITION

Fundamentals of Packaging Technology, 6th Edition is more comprehensive and better than ever. The newest Edition contains a reorganised and expanded discussion on sustainability, the circular economy, packaging law, a more in-depth discussion of e-commerce, additional on-line resources, and updated information on technical considerations, standards, and testing procedures!

This revised Edition also includes a chapter review answer key and an updated look at considerations for machinery in packaging, including robotics, augmented reality, and virtual reality.

2 GLOSSARY OF PACKAGING TERMINOLOGY

The Second Edition of the Illustrated Glossary of Packaging Terminology by Walter Soroka CPP is a comprehensive guide to packaging terminology. More than 4,500 definitions cover the scope of packaging terms with more than 250 illustrations so readers can easily understand packaging concepts. The Illustrated Glossary of Packaging Terminology is a glossary of the packaging community's language that helps you communicate effectively with other packaging professionals. This book brings together all the disparate terms of packaging into one concise, focused edition.

3 TRANSPORT PACKAGING – THIRD EDITION

The Latest Edition of Transport Packaging has arrived and is now available through the AIP Bookstore. Transport Packaging, Third Edition, provides significant updates and new information from the Second Edition, published in 2004. It was reviewed and updated by packaging industry veteran Robert Meisner, CPP-Fellow, with contributions by subject matter experts-both individuals and organisations-around the transport packaging industry. The book has been revised throughout to reflect new and updated regulations and standards, and best practices, adding to previous editions compiled the late Alfred H. McKinlay, CPP.

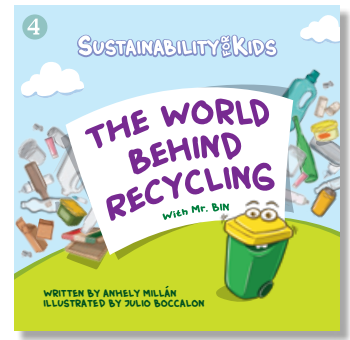

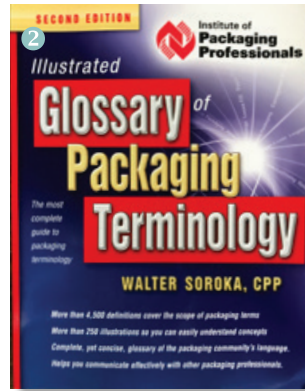

4 SUSTAINABILITY FOR KIDS - THE WORLD BEHIND RECYCLING

The book answers all of the hard questions from a young child's perspective: Have they ever looked at a product and wondered whether it is recyclable? Do they know what happens after they throw their waste away and how this waste is sorted and repurposed? Mr. Bin will travel with the child through the recycling world to discover all the secrets behind recyclability. The child will learn how to recycle at home, the different materials that can be recycled, and the wonderful recycling processes. After embarking on this journey, they will no longer see waste in the same way. They will make changes to their day-to-

day activities that can change the world, help create a better and cleaner planet, and most importantly, protect our future. Recycling is just one simple thing we all can do. A wonderful tool for schools and your own children and grandchildren (42 pages).
